EXECUTIVE SUMMARY

Rail, Road, Air and Maritime are the important modes of transport. The selection of a certain mode of transport depends on the cost, performance and development impact of alternative modes depending upon the geography and resources of the nation. The inland transport system in Pakistan largely comprises road and rail. Among the two important rail and road network, the later has become completely dominant, as country's freight and passenger movement by road has gone up to 96% and 91% respectively over the years. There are two reasons for this rapid shift of freight/passenger movement towards road. Firstly, the road transport has in the recent past not only increased reliability of time saving but has also become economical compared to the other modes of transport. Secondly on secondary and tertiary roads, this is the only feasible mode of mechanized transport. Hence, a large proportion of transport for short hauls, high value commodities perishables, and small consignments, it is the overland transport which is widely used.

Pakistan's achievement in building of roads has been quite remarkable. In 1980s the road kilometer increased from 95,355 Kms to 151,449 Kms. From 1991 to 2001, the road network increased from 170,923 Kms to 257,683 Kms and percentage of paved increased from 49% in the 1980s to 60% in 2000-01 {Table S(i)}.

Table S(i)  
Length of Road (Kms)

<u>Year</u>	<u>Paved</u>	<u>Un-paved</u>	<u>Total</u>	<u>Percentage Paved</u>	<u>Road Density (Km/Sq.Km of area)</u>
1980-81	37,242	58,113	95,355	39.06	0.12
1981-82	40,380	56,479	96,859	41.69	0.12
1982-83	42,773	57,020	99,793	42.86	0.13

1985-86	56,318	69,925	126,243	44.61	0.16
1986-87	61,464	72,483	133,953	45.88	0.17
1987-88	68,880	74,061	142,941	48.19	0.18
1988-89	74,355	77,094	151,449	49.10	0.19
1989-90	81,981	80,364	162,345	50.50	0.20
1990-91	86,939	83,984	170,923	50.86	0.21
1991-92	87,659	83,993	171,652	51.07	0.22
1992-93	94,788	84,783	179,571	52.79	0.23
1993-94	98,198	86,465	184,663	53.18	0.23
1994-95	101,901	88,970	190,871	53.39	0.24
1995-96	106,754	93,270	200,024	53.37	0.25
1996-97	113,853	94,946	208,799	54.53	0.26
1997-98	119,422	96,782	216,204	55.24	0.27
1998-99	128,451	97,735	226,186	56.79	0.28
1999-00	138,848	100,334	239,162	58.06	0.30
2000-01	155,431	102,252	257,683	60.32	0.32

The density per square kilometer of area which was only 0.21 in 1990-91 has improved to 0.32 in 2000-2001. Pakistan's road density and % age of paved road is now comparable with the developed and industrialized countries of the world {Table S(ii)}.

## INTRODUCTION

The most critical impediment in the way of conducting comprehensive research and preparing transport plans is lack of proper data. The problem is compounded by the fact that various agencies concerned with different aspects of the transport notably the Road and Road Transport operate without essential coordination. For example, roads are built by National Highway Authority, Provincial Highway Departments (executed at district level), 108 Local Councils, 171 Municipal Committees/Corporations and 44 Cantonment Boards. The public transport is controlled by transport Authorities. Taxes relating to transport are collected by taxation department, mainly through Post Offices scattered all over the country, driving licences and accidents are dealt by Police Authorities. The system of roads and road transport is fragmented and scattered. There is no single agency to whom one can approach for the collection of transport statistics.

To overcome this difficulty, Data Bank in National Transport Research Centre was set up in 1979 to collect time series transport statistics. It continued to collect, update and publish, statistics upto 1994-95. For this purpose teams of field investigators were organized who used to visit all such agencies and extract the requisite information directly from their records. Due to resource constraints survey teams could not be sent to concerned agencies for collection of data after 1993-94.

The Data Bank has tried its level best to obtain data by mail, but the response has not been encouraging. Despite all these handicaps NTRC continued its efforts and during the current year, meetings with the concerned provincial departments of Communications and Works/Works and Services, Excise and Taxation and Traffic Police were arranged and during the visits, not only the process of the collection of data was agreed to be streamlined but also collected requisite data from them. It is not out of place to mention here that the cooperation from Traffic Police, Communication and Works/Works and Services Departments was commendable. Special thanks to Traffic Police of Punjab, Sind, NWFP & Baluchistan whose cooperation in consolidation of the data was remarkable and Traffic Police Punjab in addition to their own data also provided information in respect of district-wise road and road transport upto the year 2000 which helped in bridging data gaps of the Municipal and District Council Roads.

With a view to reduce the time lag and to provide upto date and accurate statistics, National Transport Research Centre intends to issue such bulletins regularly on yearly basis. The continuous updating of data requires a team of investigators on a permanent basis. The statistical data contained in this publication has also been computerized which would not only ensure easy updating but would be used for detailed analysis of transport trends in the country.
